Maths Rockets

Use the number in the roof with the number on the side

Four rockets are shown, each with a triangular roof containing the number -2. The rockets are arranged in a row. Each rocket has a vertical column of numbers on its left side and an empty column on its right side. The numbers in the left column are: 2, 3, 6, 4, 5, 8, 7, 10, 9, 11 for the first rocket; 13, 11, 14, 12, 10, 15, 17, 18, 16, 19 for the second; 20, 21, 19, 24, 27, 23, 22, 28, 25, 29 for the third; and 31, 33, 30, 11, 13, 20, 23, 15, 25, 35 for the fourth. Each rocket is supported by two triangular legs at the base.

Maths Rockets

Use the number in
the roof with the
number on the side

Four rockets are shown, each with a triangular roof containing the number $+3$. The rockets are arranged in a row. Each rocket has a vertical column of numbers on its left side and an empty column on its right side. The numbers in the left column are: 3, 1, 2, 5, 8, 4, 9, 6, 7, 10 for the first rocket; 11, 15, 18, 12, 16, 13, 19, 20, 14, 17 for the second; 21, 26, 29, 22, 28, 25, 24, 20, 28, 27 for the third; and 33, 31, 38, 34, 30, 37, 35, 32, 36, 38 for the fourth. Each rocket is supported by two triangular legs at the base.

Maths Rockets

Bonds of 10! All the numbers on the side must be added to ? number to make 10

Four rockets are shown, each with a triangular nose cone containing the text "= 10". The body of each rocket is a vertical rectangle divided into two columns of ten boxes each. The left column contains numbers, and the right column is empty. Below each rocket are two triangles representing landing gear.

Maths Rockets

Add all the numbers on the side to ? number to make 20

Four rockets are shown, each with a triangular nose cone containing the equation $= 20$. The body of each rocket is a vertical rectangle divided into two columns of ten cells each. The left column contains numbers, and the right column is empty. The rockets are supported by two triangular legs each.
