

Bonds of 10 Puzzle

1	9	10	0
2	8	3	7
4	6	5	5
6	4	7	3
8	2	9	1

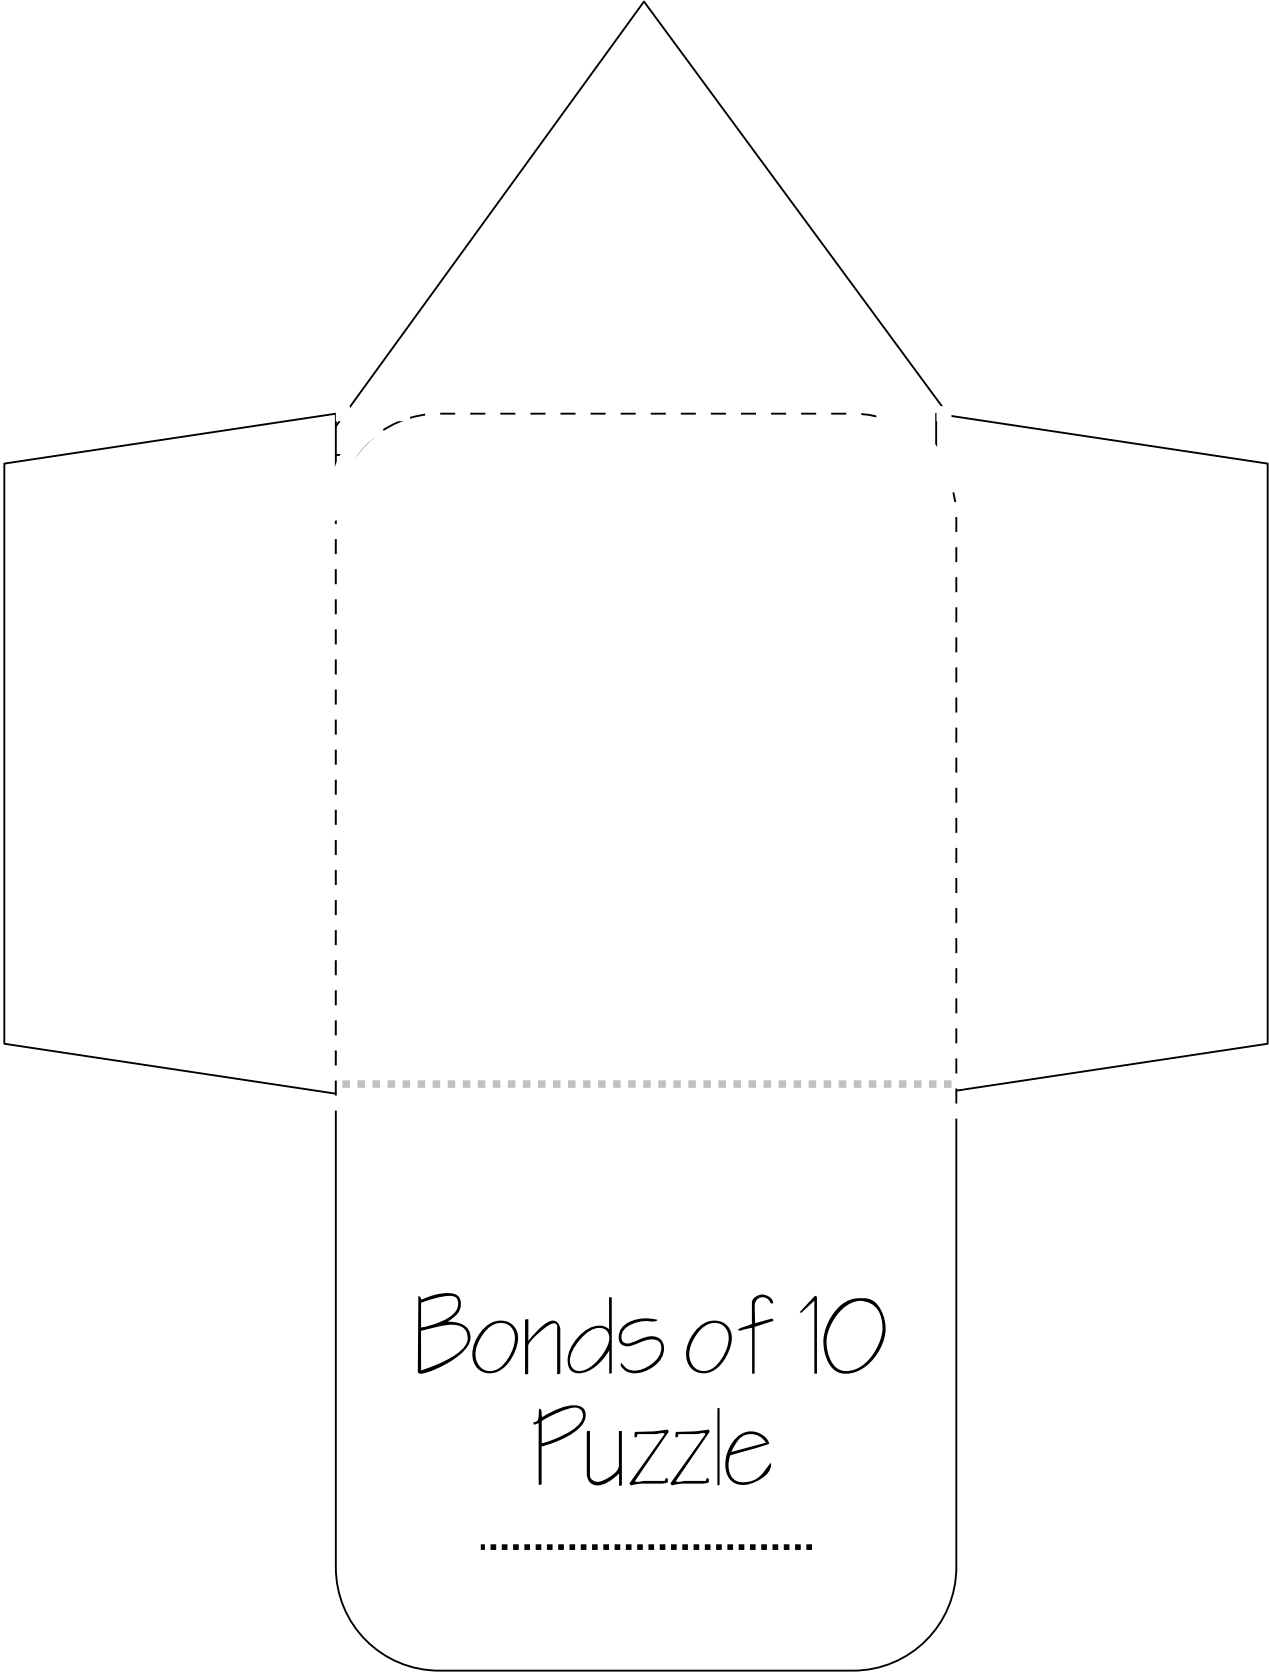

Bonds of 10 Puzzles

1. Print on card stock or print on paper and laminate after you have cut all the puzzles pieces apart.
2. Cut out the blocks.
3. Cut along the dotted lines –creating puzzle pieces.
4. Cut out the pocket. Fold the sides over. Cut a slit in the front flap. Insert the top flap into the bottom flap to close.

To Play:

1. Let the child place unifix (Maths counters) blocks on top of every number. This will be the concrete operation – working with groups of blocks.
2. Match the puzzle pieces using the shapes to guide. Use the Maths unifix blocks and place the same number blocks above the puzzle pieces. Do this several times until the child recognizes the matching numbers.
3. Let the child first match all the pieces, and then remove all the **right side** pieces **except the two 5's**. Now let the child match the correct number bonds without the shapes matching! Repeat stage 1 or 2 if they are not sure of the concept.
4. Now the child can practice bonds of 10 on worksheets. (Use the bonds 10 Maths Rockets or Amazing Maths Squares from [Practicalpages.wordpress.com](http://practicalpages.wordpress.com))
